

Videne™ Surgical Scrub

Povidone-Iodine 7.5% w/w

Pre-operative hand and skin disinfection

Broad-spectrum hand and skin preparation

For preoperative hand disinfection by the surgical team and for disinfecting the site of incision prior to surgery

- Povidone iodine is effective against a wide range of Gram positive and Gram negative bacteria, fungi, viruses and some bacterial spores. ^{1,2}
- Skin friendly aqueous solution with added emollients to keep hands moist.
- Videne Surgical Scrub is a Medicinal Product.

Videne™ Surgical Scrub

Povidone-Iodine 7.5% w/w

Broad-spectrum hand and skin preparation

Broad Spectrum Efficacy

Povidone iodine is effective against a wide range of Gram positive and Gram negative bacteria, fungi, viruses and some bacterial spores.^{1,2}

Skin Friendly

The added emollient keeps hand and skin moisturized.

Skin Staining

The brown stain from povidone iodine provides enhanced visualisation of the prepared area.

Recommended by NICE guidance NG125

NICE recommends an aqueous solution of povidone iodine where alcohol based solution or chlorhexidine are not suitable.³

Essential Information

Name of Medicinal Product: Videne Surgical Scrub

Active Ingredients: Povidone-Iodine 7.5% w/w

Indications: For pre-operative hand disinfection by the surgical team, or for disinfecting the site of incision prior to elective surgery.

Posology and Method of Administration: Pre-operative surgical scrub - after first wetting the hands and arms with water, approximately 3.5ml of Videne Surgical Scrub is applied and rubbed thoroughly on to these areas. A brush may be used to scrub the nails. A little water is added to develop a lather and finally this must be rinsed off with running water. Pre-operative skin preparation - the site of incision should be washed with Videne Surgical Scrub two or three times a day prior to the operation. Immediately before surgery the skin should be moistened with water, Videne Surgical Scrub applied and rubbed thoroughly into the area for several minutes. A sterile gauze swab is used to develop a lather which must be finally rinsed off with water.

Contraindications: Videne Surgical Scrub must never be administered orally, and is contra-indicated in neonates, and during pregnancy and lactation. Regular or prolonged use should be avoided in patients with thyroid disorders or those receiving lithium therapy. Hypersensitivity to any of the ingredients.

Warnings: Care must be taken when Videne Surgical Scrub is used on known iodine-sensitive subjects, although such people do not normally react to iodinated povidone. Application of povidone-iodine to large wounds or severe burns may produce systemic adverse effects such as metabolic acidosis, hypernatraemia, and impairment of renal function.

Undesirable effects: In very rare instances Videne Surgical Scrub may produce skin reactions in iodine-sensitive subjects. These reactions subside on cessation of treatment.

Marketing Authorisation Holder: Ecolab Ltd, Unit 1, Wernddu Court, Caerphilly, CF83 3SG, UK.

Marketing Authorisation Number: PL 04509/0042.

Legal Status: P

Cost: 12x500ml £103.32 (RRP)

Date of Revision: May 2024

Instructions for use

Pre-operative surgical scrub - after first wetting the hands and arms with water, approximately 3.5ml of Videne Surgical Scrub is applied and rubbed thoroughly on to these areas. A brush may be used to scrub the nails. A little water is added to develop a lather and finally this must be rinsed off with running water.

Pre-operative skin preparation - the site of incision should be washed with Videne Surgical Scrub two or three times a day prior to the operation. Immediately before surgery the skin should be moistened with water, Videne Surgical Scrub applied and rubbed thoroughly into the area for several minutes.

A sterile gauze swab is used to develop a lather which must be finally rinsed off with water.

Please read carefully the instructions on the SPC and the label leaflet.

TRAINING AND SUPPORT

Ecolab's national team of Clinical Implementation Specialists are available to support with all training and educational needs. Please contact your local Ecolab representative for further information.
